Schriver & Schriver, attorneys.

Diagnosis by Electricity.

For the benefit of the nervous cases that come to the doctor it has been asserted that it is just as necessary to know how emotional they are as it is to know how high the temperature is in a case of fever. Moreover, in many cases, it is necessary to find out what experiences in the past or present life of the patient produce emotions. For this purpose the patient sits at ease with hands on the electrodes, which may be so concealed in the arms of his chair that he is unaware that the most intimate processes of his soul are being registered as various words are spoken or various topics of conversation are discussed, the galvanometer showing when a sensitive subject has been touched.—Harper's Magazine.

London—The house of commons

put on record a desire that the government reconsider its refusal to participate officially in the Panama-Pacific international exposition and agree to participate.

THE ARGUS AD WILL GET IT FOR YOU—OR ELSE PROVE TO YOU THAT IT IS NOT TO BE HAD.

And the Cost is But a Few Cents

FEATHERED SCAVENGERS.

Crows as Track Cleaners and Gulls as Government Workers.

As unique a crew of track cleaners and police as could be found anywhere is enlisted in the service of the Southern Pacific railroad. The members are neither Americans nor foreigners. It is a crew of crows.

The big black birds built their nests near Hornbrook, Ore., on the northern division of the road. They have become fat and sleek living off the generosity of tourists and of dining car employees.

When the trains arrive at Hornbrook the crows leave their roosting places and circle about the depot. As the limited pull out the birds follow them for five or six miles. Scraps are thrown to them, and they devour every bit, poling the tracks and acting as scavengers. The section hands and other employees of the road realize the value of these birds and keep them from being molested. Trains crossing the Great Salt Lake are followed by sea gulls, the latter, like the crows, feasting on scraps thrown from the diners.

In a similar way the great lakes are patrolled by white winged gulls. The government protects them, appreciating the work they do in following the ships, hovering over the fishing grounds and keeping the waters free of pollution.—Chicago Inter Ocean.

Fame of Tenedos.

Tenedos, which certain powers have taken away from Greece, has become well known by name from having the good luck to get mentioned in the first book of Homer's "Iliad" instead of the last, as well as in the beginning of Vergil's "Aeneid." Ever since Homer's day this fertile islet, lying at the entrance to the Dardanelles, has been considered of great strategic importance. During classical times the laws and civil institutions of Tenedos were celebrated for their wisdom and were discussed with approval in a lost treatise of Aristotle.

It Didn't Bite.

"Is this picture show one that it will be all right for my daughter to see?" asked the man who was next at the ticket window.

"Sure," replied the girl in the booth. "I've saw it. It ain't hurt me."

Chicago Record-Herald.

The Other Kind.

Sunday School Teacher—Benny, can you tell me what a prophet is? Benny—Benny something for a dime and selling it for a smaller—Jude.

ALL THE NEWS ALL THE TIME—The Argus.
